ABOUT ME

From the moment I produced my first "Hello World" in the console of my application, I knew I was hooked into the world of software development. I'm a self taught programmer. I enjoy creating anything that interacts with the internet. My interest in programming started in school when i decided to make codes interact with machines. I found programming exciting and learnt about networking, web development and cybersecurity.

Experience

Team Vanilla Dip Hatchways

July 2021 - August 2021

A website that creates a competition for tattoo designs. The best design will win the prize money.
<https://github.com/hatchways/team-vanilla-dip.git>

1. Communicated and collaborated with teams of engineers, designers on a daily basis.
2. Work with a variety of different languages, frameworks such as javascript, typescript, react, node.js etc.

Political Flask Website

July 2021 - August 2021

A website where political members can register and print a membership card
<https://github.com/dhanzy/APC>

1. Implemented converting of html file to a PDF file.
2. Verifying phone numbers and using it as a medium for sign-up.

Projects

Wrote a program using the Solana Javascript-SDK that integrates the functionality of the Choice Coin Solana Compliance Software. The software had frontend web interface that allows a user to enter data for each factor and then push a Calculate Compliance Score button to return a result between 0 and 1. The score was also sent to an arbitrary address on the Solana blockchain as a message.

https://github.com/ChoiceCoin/Compliance/tree/main/SolBash/dhanny_solbash

Created an atomic transfer that loads two existing accounts, create a new account then sign and send a transaction.

<https://github.com/ChoiceCoin/Voting/pull/1168>

Skills

Programming Languages

Javascript (ES6), Typescript, HTML, CSS, Python, Bash

Libraries & Frameworks

React, Next, Node.js, Flask, Express, Bootstrap

Tools & Platforms

Github, Netlify, Heroku, Wordpress

Education

Afe Babalola University

2016 - 2022 // Ekiti State

Bachelor of Engineering in Mechanical Engineering
